PROFILE

Full Stack Developer with over **3.3 years** of experience specializing in **React, Next.js, Node.js, MongoDB, SQL**, and **AWS**. Proven leadership in managing a team of 8 software developers. Experienced in delivering high-impact projects, driving innovation, and optimizing performance across three major project

---

EXPERIENCE

SOFTWARE ENGINEER
HDFC ERGO, MUMBAI

July 2022 – Present

- **PROJECT: GENERATIVE AI BOTS**
  - Developed 3 distinct bots: **HR Policy Bot**: Assisted employees with HR policy-related queries. **Product Catalogue Bot**: Provided detailed information on company products. **Competitor Analysis Bot**: Enabled managers to analyze competitor data, focusing on rivals like Tata AIG and Bajaj Allianz.
  - Implemented LLM models: **Gemini-1.5-Flash-001** and **Text-Bison-32k**. Conducted **data ingestion** (PDFs/Docs) into **Google BigQuery** to train the AI models.
  - **Prompt engineered** and created the following APIs in the backend.
    - **Bot Response API** for conversational output.
    - **Suggested Questions API** for dynamic follow-up queries.
    - **Feedback API** for continuous learning and model improvement.
- **PROJECT: PEHCHAAN**
  - Pehchaan is a KYC verification system, that caters to a customer base **exceeding 10 million.**
  - Added features like **OCR for document data scanning, a human verification dashboard for verification of manual entries, and API integration for partner companies** like TVS, and Maruti.
  - Utilized **Signzy APIs** to improve verification processes and retrieved data from the CKYC repository
  - Customers with data in the **CKYC repository** were verified instantly, while those submitting manual entries experienced a turnaround time (TAT) of 12 hours for approval or rejection.
  - Our timely project delivery, in line with the IRDAI's KYC guidelines for insurance from January 1, 2023, **prevented disruptions to the company's daily sales operations**.
  - Technologies: MERN stack (MongoDB, Express.js, React.js, Node.js).
- **PROJECT: CHASE**
  - Chase is an in-house application created for managing and investigating fraud claim cases.
  - Developed two separate applications: one for **internal investigators across various hierarchies** and another for vendors to gather and input data from incident sites.
  - Engineered logic to facilitate the **seamless progression of claim cases** through different investigative stages, with **automatic adjustments in case hierarchy and invoice processing** based on claim amounts and investigator inputs.
  - Achieved a **30% reduction in costs** and enhanced **investigation accuracy by 55%.**
  - Technologies: PERN stack (PostgreSQL, Express.js, React.js, Node.js).
- Please note that MITSGLOBAL was the hiring company, while HDFCERGO was the client throughout the engagement.

WEB DEVELOPER
PROSOFOS, REMOTE

Feb 2022 – June 2022

- Led frontend development using React.js and Redux for various projects, Spearheaded the design and implementation of interactive and user-friendly interfaces, resulting in a **30% increase in user engagement**.
- Optimized code for scalability and maintainability by Refactoring existing codebase to enhance readability and efficiency, **minimized overall bundle size,** and eased future updates.

WEB DEVELOPER
LIRCTEK , BANGLORE

May 2021 – Feb 2022

- **PROJECT: E-TRUCKINGSOFT**
  - E-TruckingSoft is a platform that helps truck owners manage and optimize the utilization of their fleet.
  - Improved project **performance by 80%,** and **reduced re-rendering issues using React Profiler, Memo, and batch updates.**
  - Implemented complex logic and features, including interactive **forms, maps, tables, and dynamic graphs** on the frontend for enhanced data visualization.
  - Technologies: React.js, TypeScript, Node.js, Express.js, MySQL, Ant Design, Azure.

FREELANCE

Oct 2020 – May 2021

- Developed a full-stack e-commerce platform from the ground up, including both the admin dashboard and the customer-facing website, and deployed it on **AWS (EC2, S3).**
- Successfully delivered portfolio and business websites for clients on Upwork, increasing their sales and customer engagement.
- Technologies: MERN stack (MongoDB, Express.js, React.js, Node.js).

SKILLS

- **Languages:** Javascript (Expert), Typescript (Advanced), Python (Advanced), C++ (Intermediate)
- **Frontend:** React.js (Expert), Next.js (Advanced), Redux (Expert), Antdesign, Mui, Html5, Css3, Axios
- **Backend:** Node.js (Expert), Express.js (Expert), Nest.js (Advanced), Rest API, Redis, Kafka, Microservices
- **Database:** SQL (Expert), Postgres, Mongo (Expert)
- **Tools:** Git (Expert), Docker (Intermediate), Digital Ocean (Intermediate), Aws (Intermediate)

EDUCATION

Bachelor of Science in Information Technology
Gr. Patil **Mumbai University**
Overall CGPI: ***8.13***

Full Stack Developer Bootcamp
Edyoda
June 2020 - Dec 2020
